VON HAMM-YOUNG ANNOUNCE NEW ARRIVAL-1916 SMALL '6' BUICK

The von Hamm-Young Company, Ltd., announce the arrival this week of the 1916 model "D-45" small "6" Buick touring car. This car is the latest word in Buick overhead valve motor construction, which, combined with their new stream-line body, presents the classiest light "6" car that the local market has ever seen.

The principal points remarked upon by the numerous visitors to the von Hamm-Young Company's salesroom, are the cantilever spring suspension, low slung body with gasoline tank in the rear, and one-man top. It is practically impossible, in a written article, to get a fair idea of the actual flexibility and comfort of these cars as their appearance and size fall far short of indicating the car's wonderful power and its easy and luxuriant riding qualities.

This is the first time in the history of the automobile industry that Honolulu buyers have been afforded an

opportunity of purchasing a strictly high-grade six-cylinder touring car under \$1200.

The equipment includes electric lighting and starting system, together with electric horn and demountable rims carrying 32x4-inch tires.

The gasoline is fed automatically from the tank in the rear to the carburetor by the improved Stewart vacuum system, thus eliminating all necessity of bothering with a hand pump pressure feed.

This car is also issued in a roadster, model "D-44," embodying all the latest features of design, with enclosed rear deck and full equipment, same being identical to the equipment furnished in the model "D-45."

Prices of these cars, f. o. b. Honolulu are as follows:
Model "D-44," \$1150 terms; \$1125 cash.
Model "D-45," \$1185 terms; \$1160 cash.
